PURPOSE & SCOPE

Your first five minutes in SDR Lab.

Build MSP fluency, practice realistic outbound decisions and apply feedback. Your training record helps you and your administrator choose the next useful step.

Reviewed interface with fictional examples. Your assigned learning and personal progress will differ.

01
Learn
Understand a service and the business outcome.

02
Practice
Use evidence to choose a proportionate response.

03
Apply
Submit work, use feedback and try again.

Open the portal

Start with Portal walkthrough in the header or the home card.

YOUR PROFILE

Make the portal yours.

Sign in using the account that was invited. Complete your profile on the first visit; use My profile in the header to update it later.

1 Use your real name

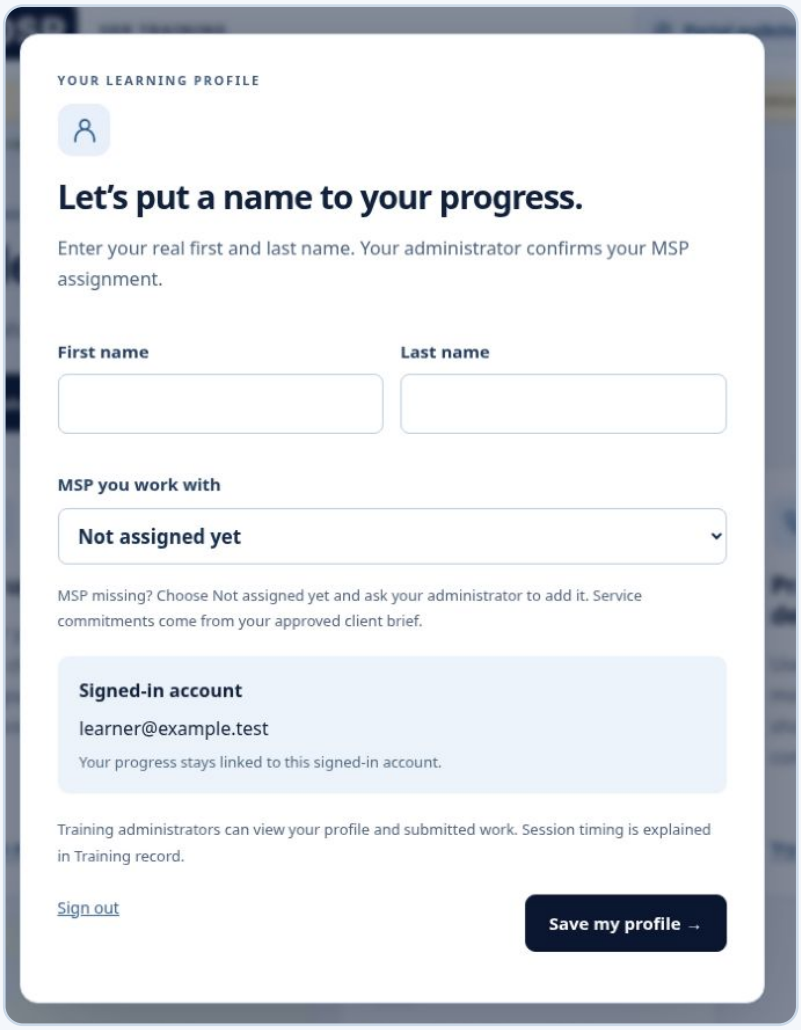

Enter your first and last name so your administrator can identify your learning record.

2 Select your MSP

Choose the MSP you work with. If it is missing, select Not assigned yet and ask your administrator to add it.

3 Save your profile

Your administrator confirms the profile and assignment. The signed-in account keeps your progress linked across devices.

Fictional account shown. Your profile does not replace the approved client brief.

Where to go next

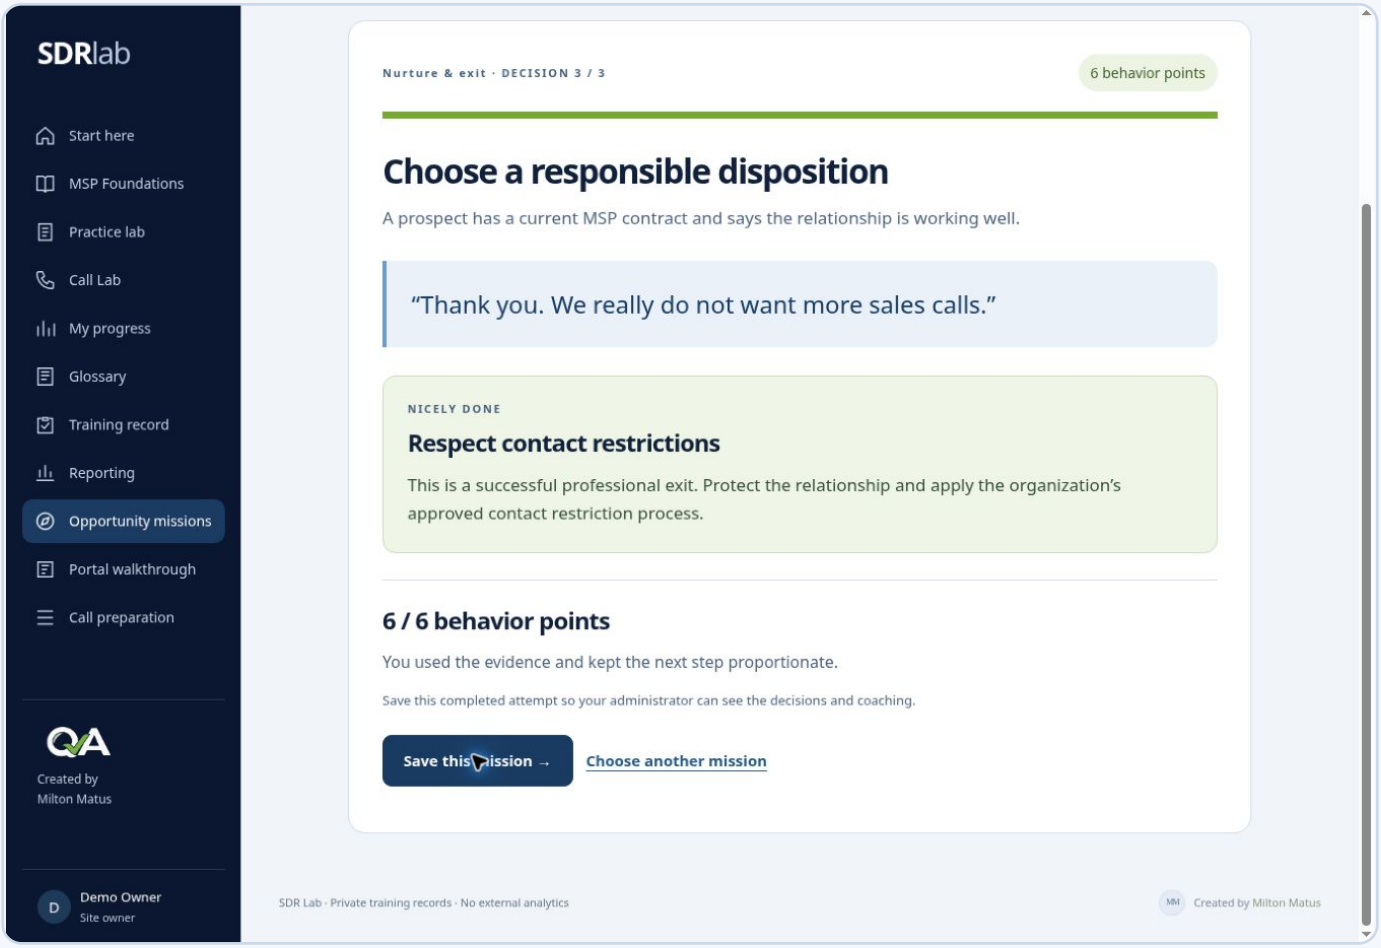

Start here	Continue the next required activity.
MSP Foundations	Explore services, outcomes and discovery.
Training record	Review submitted work and feedback.

Open the walkthrough

DECISIONS & FEEDBACK

Practice with purpose.

Choose one activity for the skill you want to develop. Read the coaching, identify one adjustment and carry it into your next attempt.

Find the Opportunity: a fictional mission using published scenario criteria, with three decisions per attempt.

Call preparation

Use four concise prompts to prepare a question, a relevant benefit and a next step. Expand an example, then open its related practice.

Open playbook

Call Lab

Follow a complete conversation. Listen for changing signals, choose the next move and record the outcome supported by the agreement.

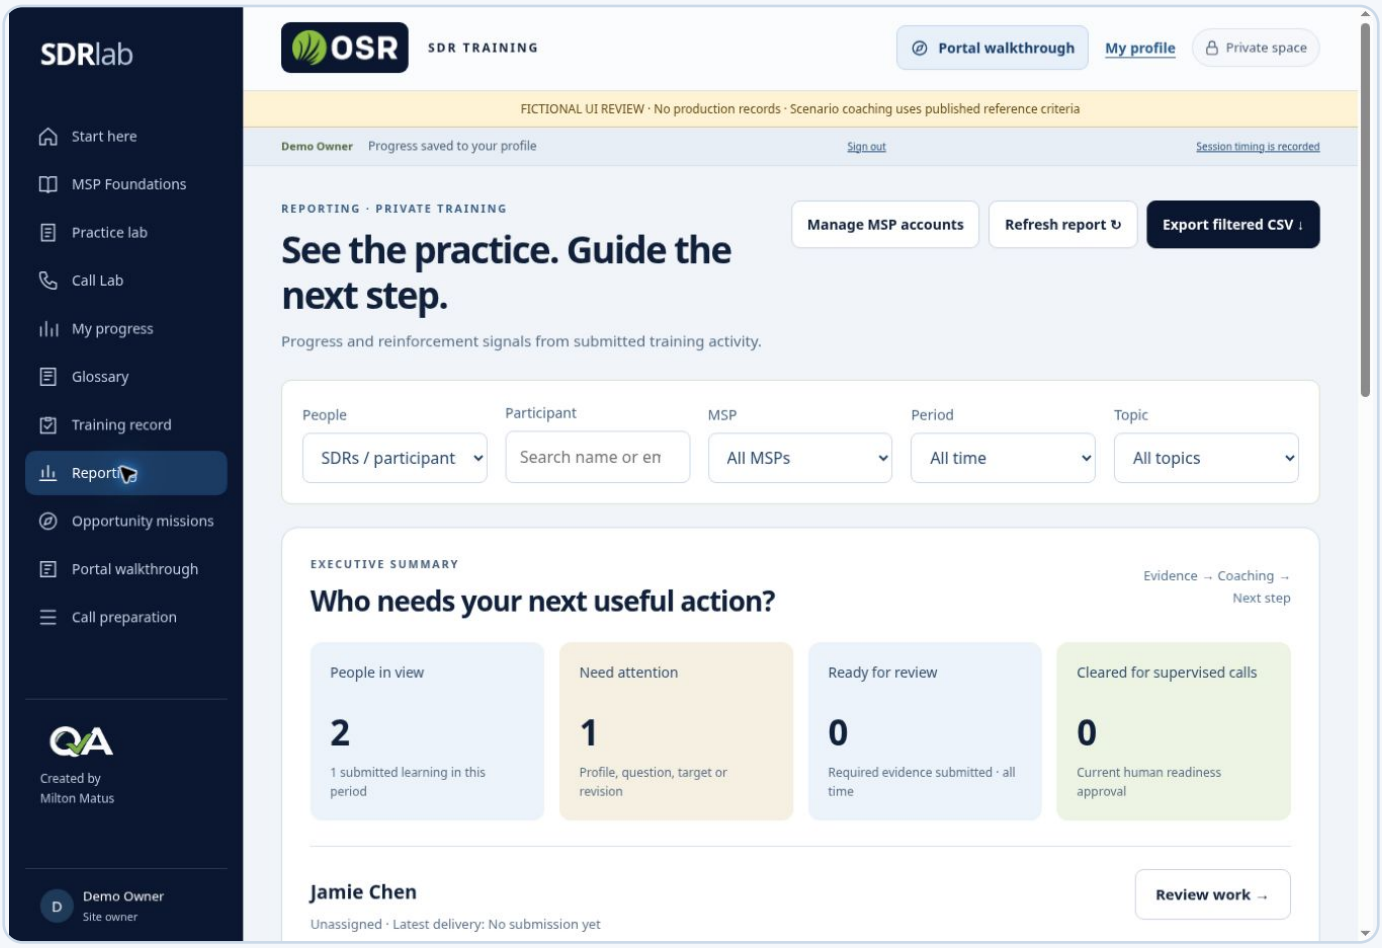

Open Call Lab

A professional exit can earn full points when the evidence calls for it.

ADMINISTRATORS

Guide the next useful step.

Open Reporting to see the executive summary. Filter by participant, MSP, date or topic, then open the evidence behind a coaching action.

Fictional reporting example. Training and timing data remain subject to the participant permissions.

Keep the responsibilities clear

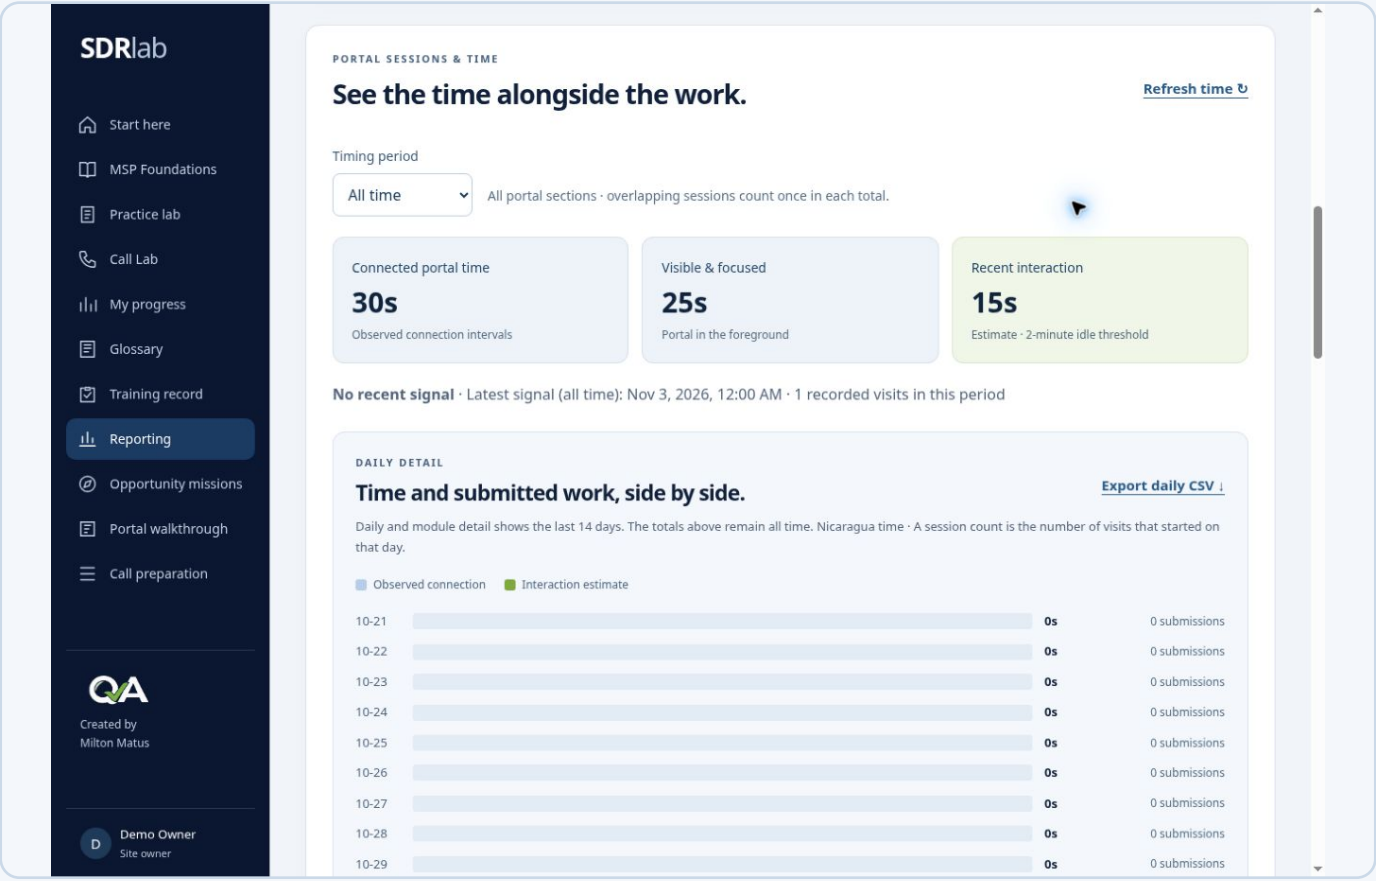

Trainee	Learning, practice, feedback and their own record.
Training admin	Team reporting, account assignments, coaching and readiness review.
Owner	Administrator roles, visitor access and technical site settings.

Open Reporting Confirm profiles. Review work. Open the supporting evidence.

TIME & LEARNING EVIDENCE

Read time with context.

From Reporting, choose View record, then Portal time. Trainees can see their own timing in Training record. Select a date window before exporting.

Fictional timing example. Use daily CSV for the selected date window and session CSV for visits.

Connected

Signed-in connection intervals observed by the portal.

Visible & focused

The portal was visible and had focus.

Recent interaction

An estimate that pauses after two minutes without input.

Reading can continue without input. These measures show observed portal use; assess learning through submitted work and coaching.

Detail covers up to 90 days. All-time totals remain available. Module timing starts with this release; earlier section durations cannot be reconstructed.
